Small world

BY TOM BRISCOE

Our Future
Students!

What You See Is What You Get!

- Html editors that show you the end results as you type
- You see what the final product will look like as you create it.

Plan, Plan, Plan

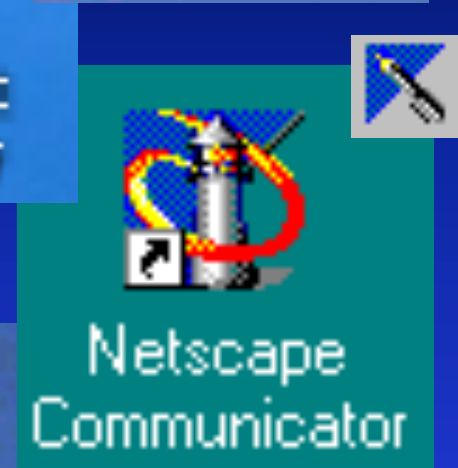

- Before Beginning
 - What do I want it to say?
 - Why do I want it to say it?
 - Who is my primary audience? Secondary?
 - How can this information be presented?
 - Textually
 - graphically
 - both

Develop a Strategy

- One page or multiple pages
- connected
- navigation
- appearance
 - titles
 - pictures

Under Construction!

- Select an html editor
 - Microsoft Word
 - Microsoft Publisher
 - Netscape Composer
 - Microsoft FrontPage
 - Macromedia Dreamweaver
- Enables user to produce an html document without needing to know html language

Netscape Composer

- Media Center Template

- Netscape Composer Tutorial

The Composer Environment

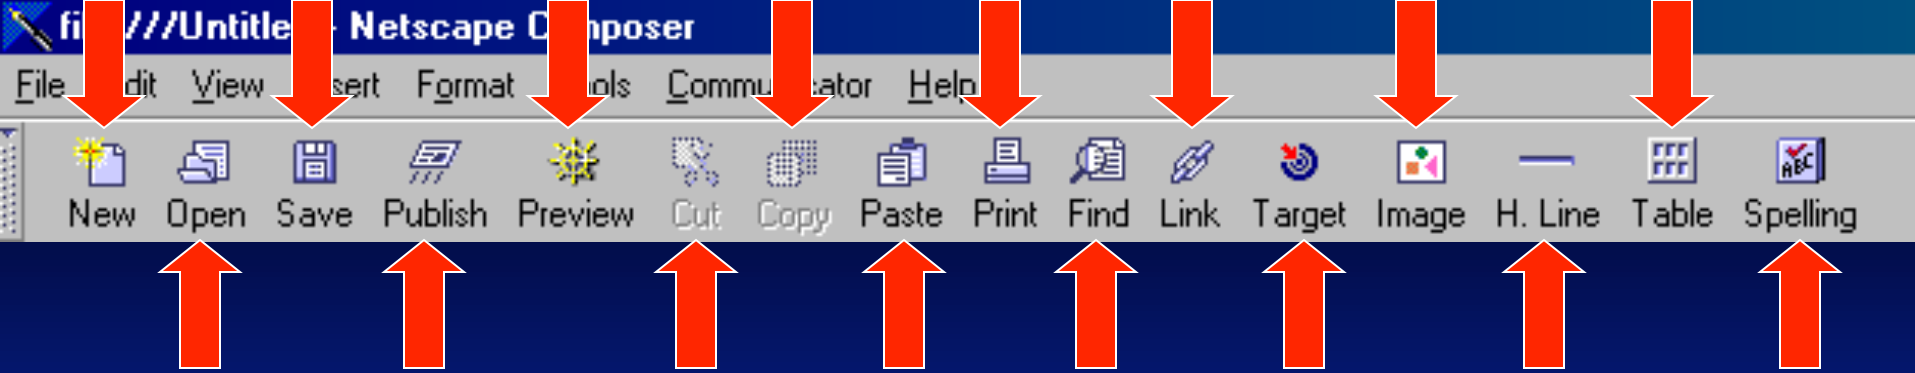

- Opens to a blank page like this
- Many of its features are similar to a word processor.

Toolbars

- Menu Bar
 - access functions of composer with “drop-down” menus
- Composition Toolbar
 - shortcuts to several of the more common functions used

- New - make a new page
- Open - open an existing page
- Save - save the current page
- Publish - Upload the current document to the proper server
- Preview - view the page in browser format
- Cut - cut text or an object
- Copy - Copy text or an object
- Paste - Paste the things you copied
- Print - Print all the pages of the current document
- Find - find a word or phrase in the current page
- Link - create a link to a different page
- Target - create a target to a specific point in a page
- Image - insert a picture
- H. Line - insert a horizontal rule
- Table - Insert a table
- Spelling - Spell check your work

Formatting Toolbar

Very similar to
Microsoft Word
Type of text

Folder List

Normal HTML Preview

A folder will be created.
Inside will be the web page file and
image files used

The screenshot shows the Microsoft FrontPage interface. On the left, the 'Folder List' pane shows a tree structure under 'C:\My Documents\My Webs' with folders '_private' and 'images', and a sub-folder 'scasl'. Inside 'scasl', there are files 'ChildrenLine.gif' and 'home.htm'. A large red arrow points from the 'scasl' folder to the main editing area. The main area displays a web page titled 'scaslhome.htm' with the following content:

- Inserting Text** (in large blue font)
- [Hyperlink to URL](#) (in blue, underlined text)
- Adding Images
- A row of 15 cartoon children of various ethnicities and clothing.
- Time to Save & Name!

At the bottom of the window, there are tabs for 'Normal', 'HTML', and 'Preview'. The status bar at the very bottom shows '8 seconds over 28.8' and 'NUM'.

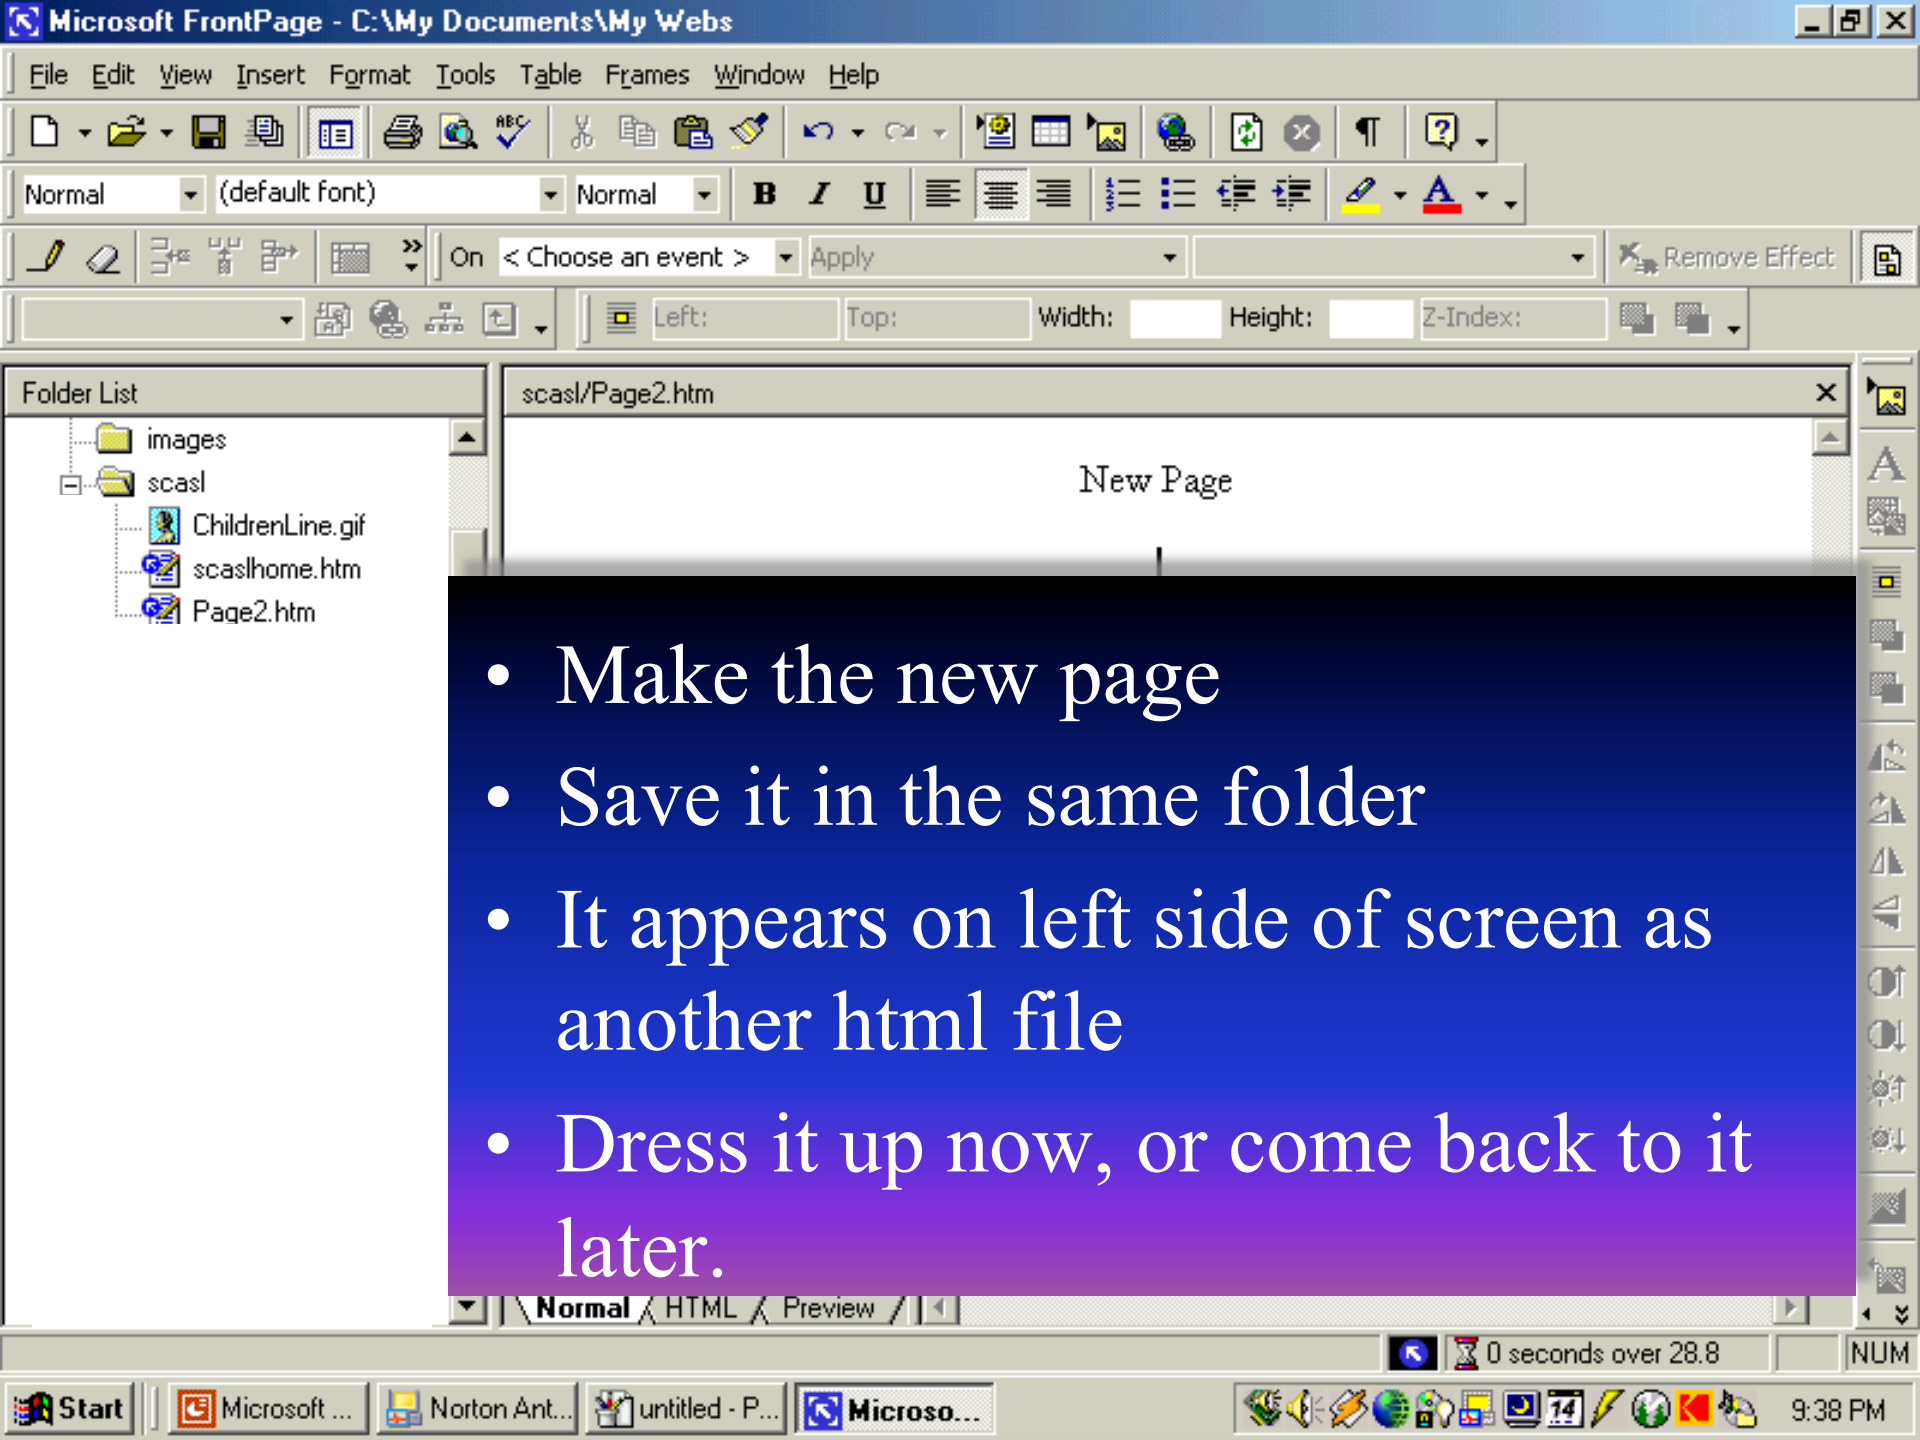

- 2 ways:

- Click the plain white page icon
- Go to “File,” “New Page”

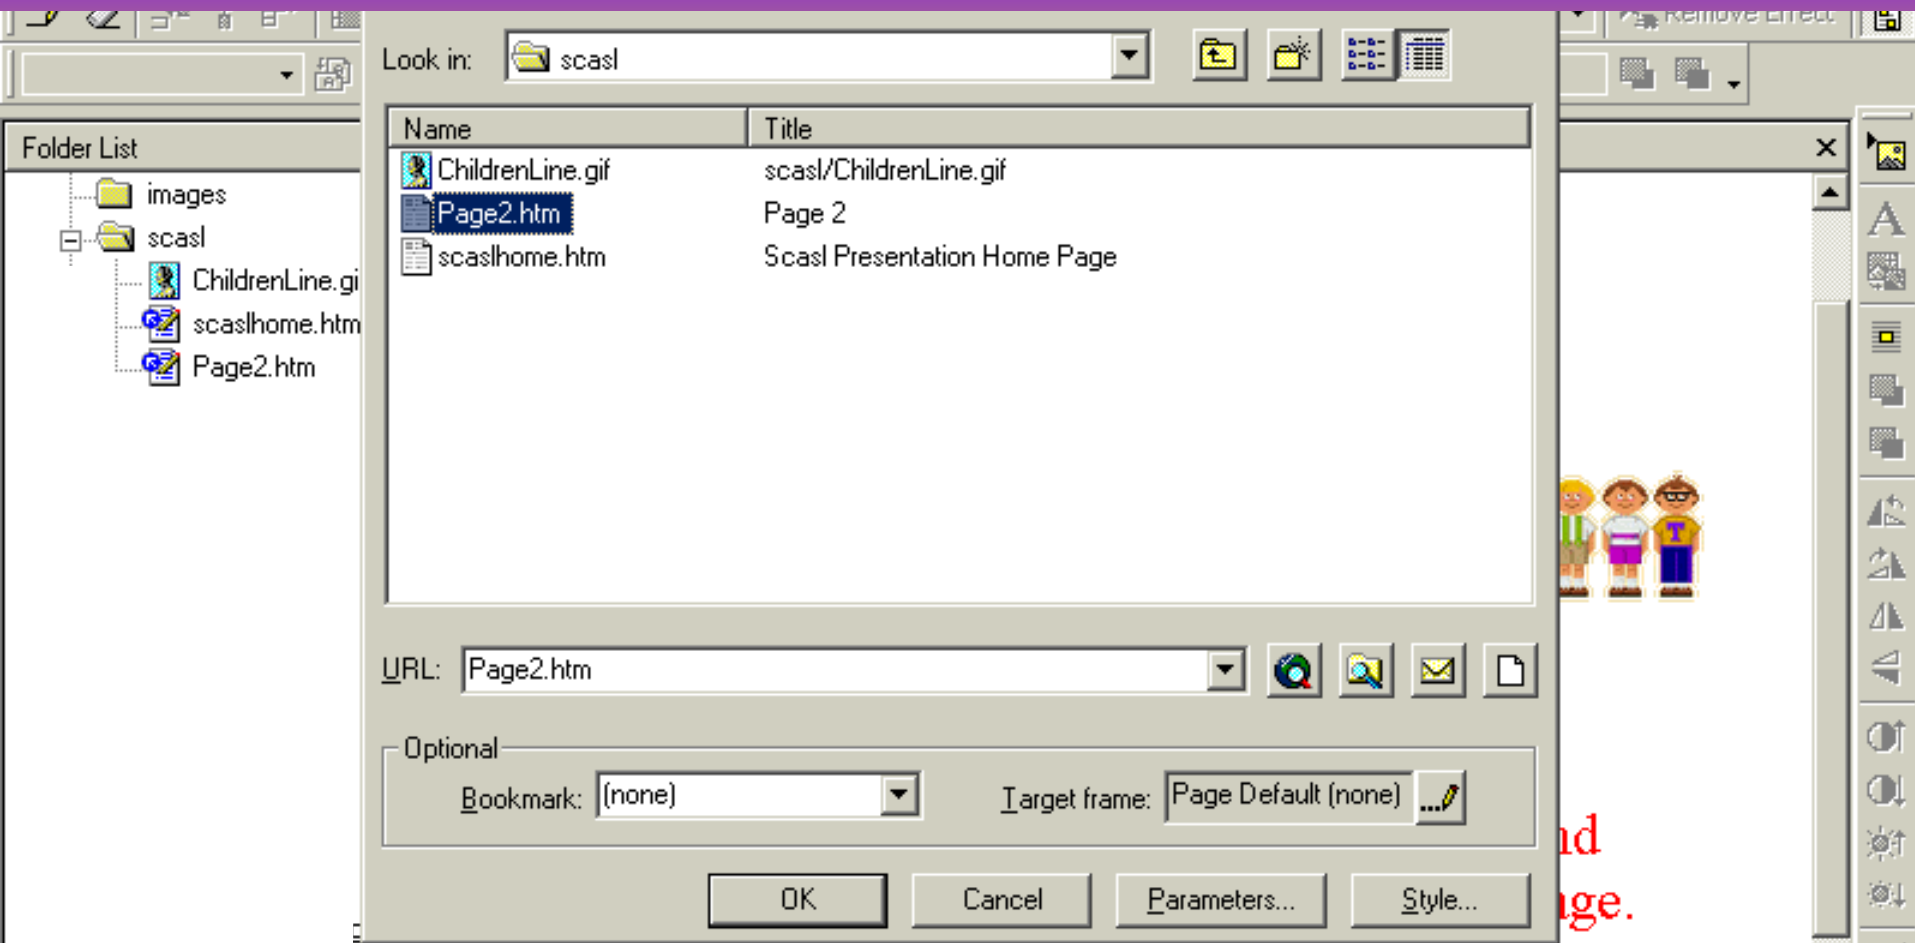

Time to Save & Name!

Hyperlinks to new pages.
You must first create the new page
and save it in this same folder

- Make the new page
- Save it in the same folder
- It appears on left side of screen as another html file
- Dress it up now, or come back to it later.

- To connect (hyperlink) two pages
 - Highlight the text or image
 - Click your hyperlink button (earth & chain link icon)
 - Find your folder with your html pages
 - Click on the page you want to link

scasl/scaslhome.htm
